## Panel / Crosscut Saw

Manufacturer's recommendation.

For sawing across the grain. For soft woods a saw with larger teeth is recommended (4.25mm pitch). However, for hard wood and fine work a saw with smaller teeth should be used 2.5mm or 3.5mm pitch, accurate cutting requires a shorter saw, while for rough work a longer saw is recommended.

## RipSaw

Manufacturer's recommendation.

A rip saw is specifically designed for sawing with the grain and is not recommended for sawing across the grain.
